PROFILE SUMMARY

A motivated Full Stack Python Developer specializing in building dynamic, responsive web applications using Django and contemporary front-end stacks. My focus is on delivering clean code and optimal performance. I am eager to translate my foundational skills and passion into impactful contributions with an innovative team.

COURSE & CERTIFICATION

Python Full stack Development   March - 2025
Aesthetix Edu tech | Vytila

Developed dynamic web application using Python-django, Html, java script, react.js sqlit3 and bootstrap. Acquired hands on experience in RDBMS (Mysql, Sqlit3) enhanced problem solving skills.

Frontend Development   May - 2025
Meta l Coursera | online certificate

Acquired comprehensive proficiency in building dynamic, responsive web applications using React.js, HTML, CSS, and JavaScript through Meta's professional curriculum. Developed practical skills in modern UI design and front-end frameworks like Bootstrap to create seamless, user-centric digital experiences.

Principles of UI/UX Design   May - 2025
Meta l Coursera | online certificate

Mastered user-centered design principles by conducting user research and creating personas to drive intuitive interface decisions. Gained technical proficiency in Figma to build interactive wireframes and polished UI components for responsive web applications

PROJECTS UNDERGONE

Emirathi Mandi Restaurant | Website Development   2025
Personal project

Designed and developed a fully responsive website for 'Emirathi Mandi,' a multi-cuisine restaurant, utilizing HTML, CSS, and JavaScript to showcase the menu and brand identity. Integrated GSAP animations to create dynamic visual interactions, ensuring a modern and engaging user experience across all device sizes.

FIXIT | Website Development   Feb - 2025
Academic project

Developed 'FIXIT,' a full-stack home service platform using Python and Django that connects users with local professionals for maintenance and renovation tasks. Collaborated in a two-person team to design and build a functional prototype within two months, utilizing HTML, CSS, and SQLite3 to manage service bookings and user data.
